For example, a word processor application, a spreadsheet application, and a web browser application are examples of applications that are executed on a computer. The applications may be executed on a user's computer, an application server computer, a business server computer, or another type of computer. For example, an application server may execute one or more applications in response to receiving one or more requests from client computers via a network. In many applications, the data that is manipulated by the application is organized into database objects. For example, in an application that generates reports, the data is organized into one or more database tables that are queried by the application to generate the report. Often, it is desirable to protect the data of a database object from unauthorized access. For example, a user that is logged into an application server may execute an application that manipulates data in the 82157476af
